

7 ways
a folder
inserter can
change your
#worklife

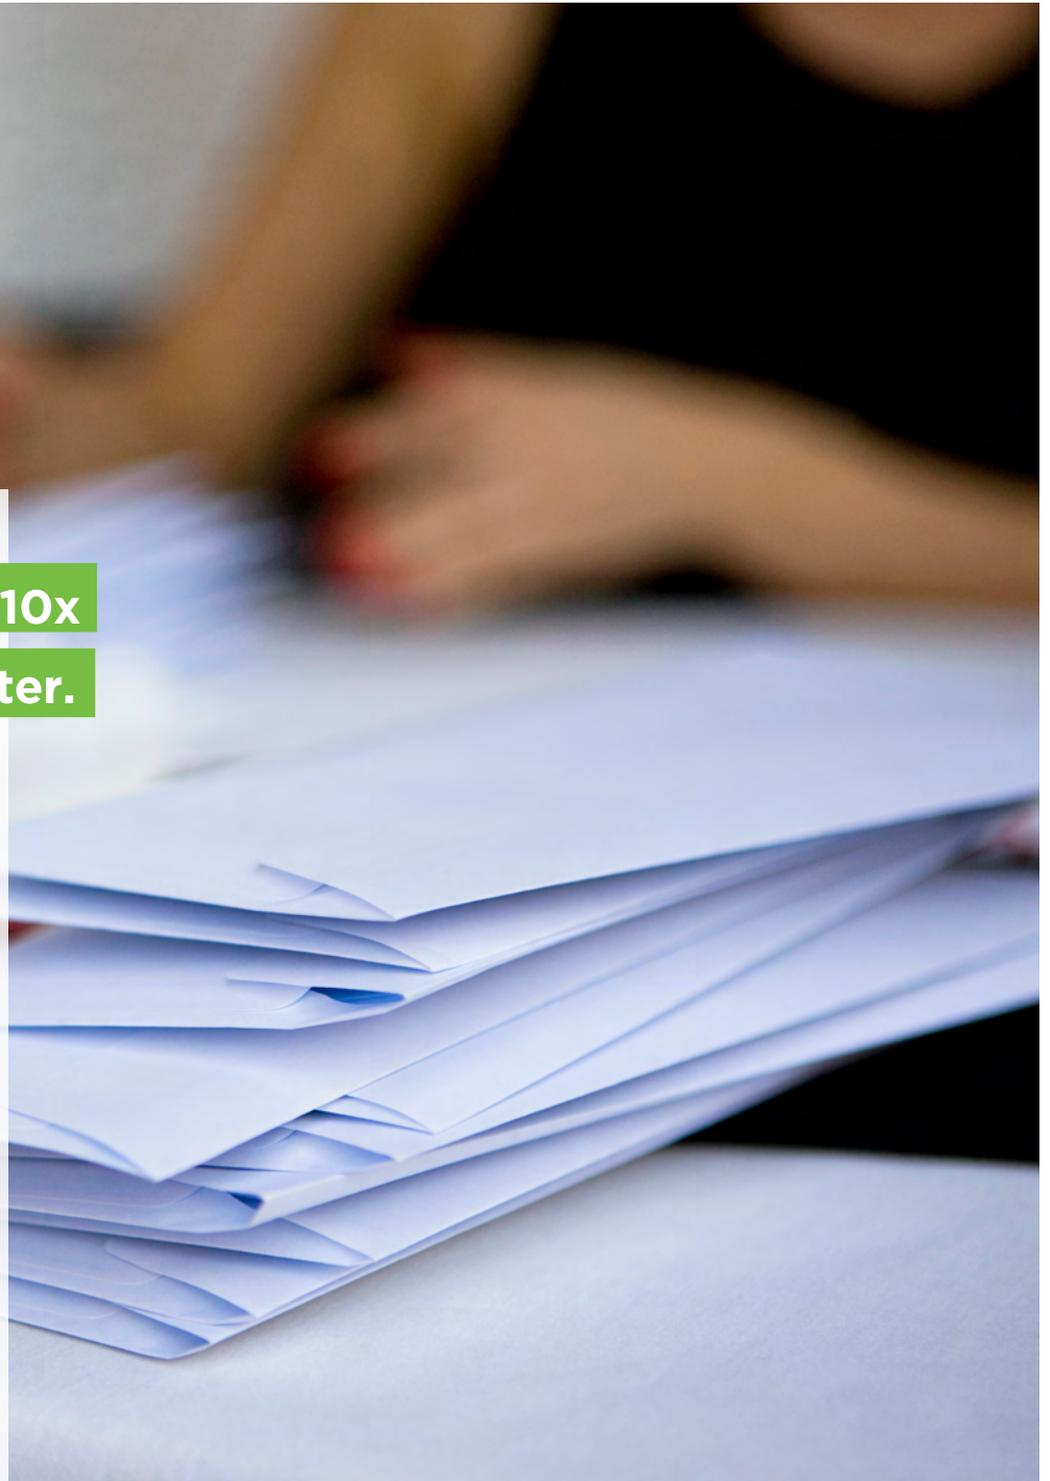

quadi⁷ent
Because connections matter.

1

**You can stuff envelopes 10x
faster with a folder inserter.**

Imagine assembling all of your monthly invoices, statements, and marketing materials in under an hour! Our folding machines fold, sort, stuff, and seal envelopes, so the mail gets out much faster. Getting the mail out faster means getting invoices paid quicker and more time for other projects.

2

**You can save hours of
time every week by using
a folder inserter.**

Time is a commodity for small businesses. Employees carry greater workloads, extra responsibilities and time-intensive tasks, like folding mail and stuffing envelopes. Small businesses can save up to 8 hours by processing mail with a folder inserter. That's an entire workday! Instead, you can book some appointments, connect with your team or schedule that long overdue doctor's appointment.

A green piggy bank is positioned on top of a white calculator. The piggy bank has two black dots for eyes and two vertical lines for a snout. The calculator is on a wooden surface. The background is blurred, showing what appears to be a bookshelf.

You can save money

using a folder inserter.

Whether you're a small business or a lean start-up, you are probably very familiar with bootstrap budgets. A folding machine makes a good return on investment, saving businesses hundreds of dollars in productivity and labor costs each month and reducing days outstanding so you can get paid sooner.

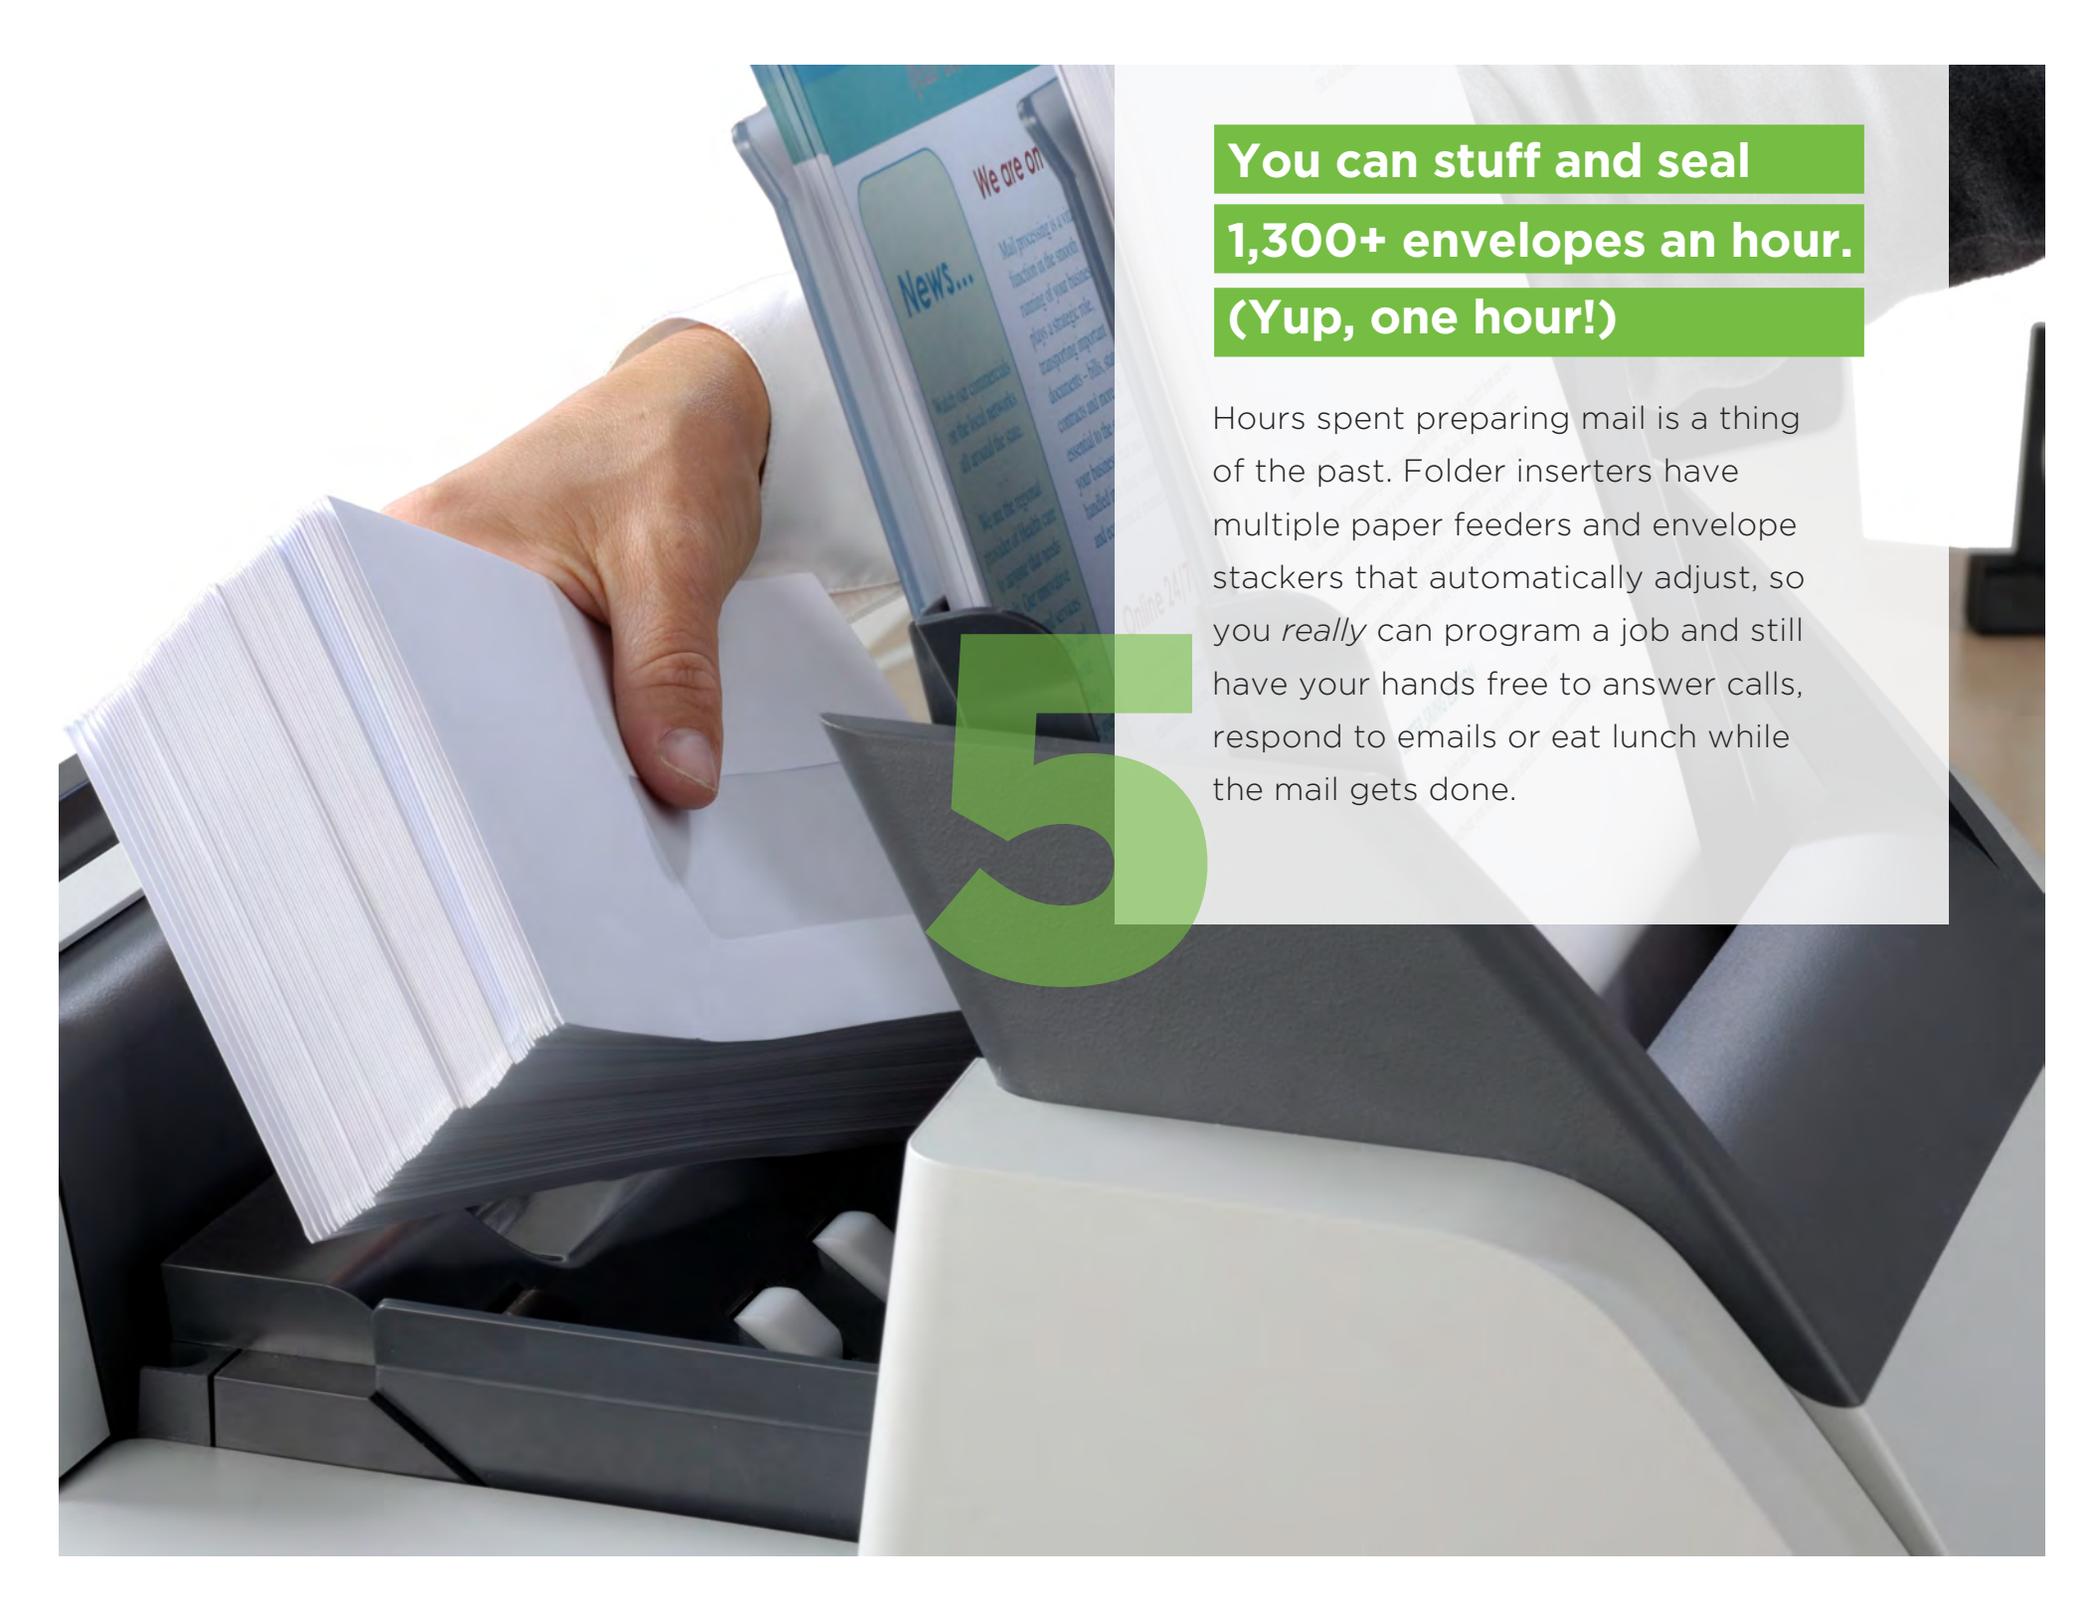

3

A hand is shown holding a white paper airplane against a bright blue sky with scattered white clouds. The paper airplane is a simple, classic design with a pointed nose and a tail. The hand is positioned in the lower-left quadrant of the frame, with the thumb and index finger gripping the body of the plane. The background is a clear, vibrant blue sky with soft, white clouds. The overall scene is bright and airy, suggesting a sense of flight and freedom.

You can fold any type of mail. (Except origami!)

Folder inserters can handle all common types of envelopes and a wide range of papers and document folds, from c-fold and accordion to parallel or no fold at all. Plus only Quadient tests your mail on our machines before you buy, so you can be sure it's processed perfectly.

4

**You can stuff and seal
1,300+ envelopes an hour.
(Yup, one hour!)**

Hours spent preparing mail is a thing of the past. Folder inserters have multiple paper feeders and envelope stackers that automatically adjust, so you *really* can program a job and still have your hands free to answer calls, respond to emails or eat lunch while the mail gets done.

A woman with short blonde hair and green glasses is sitting at a desk in an office. She is smiling and looking towards the camera. In front of her is a large computer monitor. The background shows a dark wall with some papers pinned to it.

You can set it up without any help from IT!

Quadient folder inserters are office friendly and easy to use. A local Quadient service rep will install your folder inserter without any IT help so you'll be up and running quickly. And thanks to the guided setup and large touch screen, you'll have everyone in the office using it. Don't be surprised to see employees lining up!

You can stop stuffing.

A folder inserter puts an end to company-wide manual stuffing. And that's a good thing! Today's businesses are held to a high standard for protecting consumer data, including mail correspondence. Folder inserters use barcoding technology to avoid manual folding errors. So when it comes to teamwork, you can still gather everyone together for a pizza party, but you can use that valuable time together to expand the business or share expertise.
